

The "Star Reach Festival", a **stepping stone for aspiring idols**, has begun!  
As a producer, you will **manage an idol** and aim to achieve the **greatest audience attendance** by having the idol perform on stages at the festival.  
Pay attention to the audience turnout, the idol's personality, and avoid **"Stage Clashes"** with other producers to guide your idol to stardom.

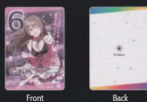

## Contents

※A list of the included cards is on the back of the book

Idol cards (9 types, 1 of each)

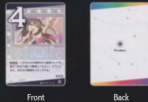

SP Producecards (9 types, 1 of each)

Common Produce cards (9 types, 1 of each)

Song Produce cards (9 types, 1 of each)

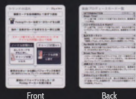

Audience cards (6 types, 27 cards total)

Audience card "Finale" (1 card)  
※ Same image on both sides

Summary cards (5 cards)

PickUp Token  
+ Acrylic Stand (1 piece)

Live performance pamphlet (1 sheet)  
※ Not used during the game

## Reading Cards

### ■ Produce Card

- Stage Number**  
The stage number where the idol will perform.
- Effect Text**  
The effects activated when a card is played. Some cards have no effects.
- Produce Type**  
The type of Produce card. There are three types: SP, Common, and Song.
- Idol Icon**  
This icon indicates the cards feature the same idol.

### ■ Idol Card

This icon indicates the cards feature the same idol.

**Charge State Rules**  
The rules related to Charge State are shown here.

**SP Reference**  
The effects of the Idol's SP Produce card are shown

### ■ Audience Card

- Quantity**  
The number of copies of the card type that exist
- Card Name**  
Certain Audience cards have names.
- Attendance**  
Score for the game.
- Effect Text**  
Effects are only shown on "Request" cards.

### About Produce card sets

Each Idol has **5 Common Produce cards**, and **1 SP Produce card**, all of which share the same Idol icon.

Before you setup the game, it's a good idea to organize your Produce cards into sets for each Idol to ensure a smooth start.

Example) Himeno Eri's Produce card set

Icon:

Common

SP

# Game Setup

Players should sit around a table.

## 1 Selecting Idols

- Each player chooses an Idol to represent using any method, and receives that Idol's card and the corresponding set of six Produce cards. The Idol card is placed face-up in front of the player.
- Each player receives 1 Summary card.

- 1 You will receive the cards with the same Idol Icon as the Idol you selected.

## 2 Deal Song Produce cards

- Shuffle the 8 Song Produce cards face-down and deal one card face-down to each player. In addition to the aforementioned set of Produce cards, each player will have a total of 7 cards in their hand.
- A player's hand can only be seen by the player it belongs to. Ensure other players cannot see the the cards in the hand.
- The remaining Song Produce cards are placed in pile at the edge of the table. Players cannot see the cards in this pile.

Hand

Song Produce cards

- 2 Randomly deal Songs.

## 3 Setting up the Audience Deck

- Place the Audience card named "Finale" in the center of the table.
- Take the 27 Audience cards except the "Finale", align the top, bottom, front, and back of all cards, then shuffle them. Place the pile on top of the "Finale" card face-down. This is called the Audience Deck.

Audience Deck

- 3 Place the "Finale" card at the bottom of the Audience Deck.

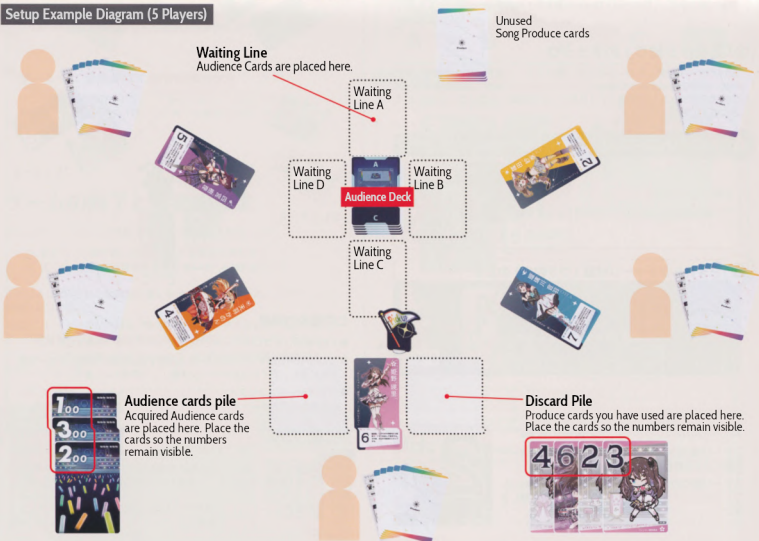

"Finale" card

## 4 Determine the Pickup Player

- The player who is most confident in their idol production skills, or a player chosen by any suitable method such as Rock Paper Scissors, will receive the Pickup Token and place it near their Idol card.
- The player who holds the Pickup Token is called the "PickUp Player".

## Setup Example Diagram (5 Players)

# Game Overview and Victory Condition

The game proceeds in phases called "rounds."

In each round, players produce a stage performance for their assigned idol and draw in audience members from the waiting lines.

Be careful of "Stage Clashes", which occur when multiple idols try to perform on the same stage!

In order to revise the production plan, we will not be able to draw in an audience for that round.

However, if the idols are in the "Charged State", and full of motivation, they can still perform and draw in an audience even if there is a "Stage Clash."

When all seven rounds are completed, the player who has attracted the most spectators wins.

## Round Flow

Each round proceeds through the steps ① to ⑤.

### ① Form the Waiting Lines

The PickUp player places a card from the top card of the Audience Deck in each Waiting Line face-up in the order A → B → C → D. (See example)

- The markings A-D on the back of the Audience cards indicate virtual areas called "Waiting Lines" on each side of the Audience deck.
- The positions of Waiting Lines A-D will not change during the game.
- If more than one Audience card is placed in a single Waiting Line, stack the cards so the numbers remain visible.

### ② Announcing the Production Plan and Resting

First, the PickUp player places one Produce card from their hand **face-up** in front of them. (Skip if they have no cards in their hand.)

Next, all other players place one Produce card from their hand **face-down** in front of them. Once all players have placed their cards, simultaneously flip and reveal their cards.

All players who revealed "Rest" do not participate in steps ③ and ④ described below, and instead **process the effects of "Rest" at any time before all other players have completed step ③**.

Once the effect of "Rest" has been processed, place it in your discard pile. (See the "Arranging Cards" diagram.)

### ③ Check for a "Stage Clash"

If two or more cards revealed by players have the same Stage Number (the number in the upper-left corner), a "Stage Clash" occurs, and the owners of those cards each perform either the effect A or B described below, depending on their Idol's status. (Face-up or face-down Idol card.)

#### A When the Idol is in the Normal State (face-up)

Return the revealed card **to your hand**.  
Set the Idol to the Charged State (face-down).

#### B When the Idol is in the Charged State (face-down)

Leave the revealed card **as it is**.  
Set the Idol to the Normal State (face-up).

### Stage Number Changes Due to Card Effects

The "+" symbol next to the Stage Number indicates the value will change due to a card effect.

When determining Stage Clashes or the order Performances are carried out, **the values after applying card effects** are used.

### Audience card placement order

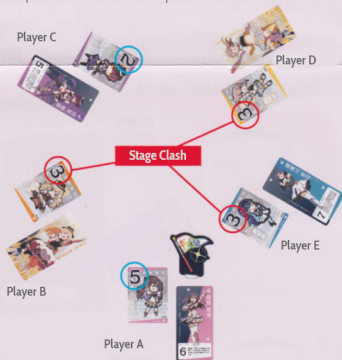

For the second card onwards, stack with the numbers visible.

### Example Stage Clash

※Components not used in the example are not shown.

### Stage Number Changes Due to Card Effects

- The players B, D, and E who revealed a "3" will have a **Stage Clash**.
- Player E has their Idol in the Normal State, so they return their card to their hand and set their Idol to the Charged State (face-down).
- Players B and D have Idols in the Charged State, so do not return their cards, and instead set their Idols to the Normal State (face-up)

### ■ Tips

If a card is returned to your hand due to a Stage Clash, you lose the ability to Perform during the round and will not be able to acquire any Audience cards.

If your Idol is in the **Charged State**, you will **avoid losing the opportunity to Perform** due to Stage Clashes.

## ④ Performances

Players will Perform (described below) in order, starting from the player with the highest Stage Number on their revealed Produce card.

If two or more players have cards with the same Stage Number, priority begins with **the player closest in a clockwise direction from the PickUp player.** (The PickUp player has the highest priority.)

Each player's Performance will follow the steps 1-4 described below.

1. If the effect of a Produce card says "before performing," process the effect. (Skip this if the effect cannot be processed.)
2. Resolve the performance.

### What is Performing?

To Perform, select one Waiting Line where Audience Cards are placed, and acquire all Audience Cards in that line.

If there are no Audience cards in a Waiting Line, do nothing.

3. If the effect of a Produce card says "after performing," process the effect. (Skip this if the effect cannot be processed.)
4. Place the Produce card used to Perform into your Discard Pile.

Card effects are always processed if able, but if a card says "you may...", then the player may choose not to process the effect.

Acquired Audience cards and discarded Produce cards are placed with the numbers visible, shown in the "Arranging Cards" diagram below.

Once all players who are able to Perform have finished processing the above steps, proceed to "⑤ End of the Round".

## ⑤ End of the Round

The **player who first Performed** during this round is given the PickUp Token. However, if no player Performed, the PickUp Token does not move.

If any cards remain in the Audience Deck, begin the next round. If no cards remain, instead proceed to "End of the Game".

## No cards in hand during the game

Players who do not have any cards in their hand at the end of a round will temporarily leave the game and then rejoin during the "End of the Game" phase.

## End of the Game

Each player finds their final Attendance using the following steps:

1. Sum the Attendance numbers on acquired Audience cards.
2. Apply any effects in the Discard Pile modifying Attendance.

Using the above steps, the player with the highest total number of Attendees will be the winner of the game.

If there is a tie, the player with the fewest Audience cards will win. If there is still a tie, the players share the victory.

The idols who achieve victory at this festival will undoubtedly be given even more chances to shine in the future!

## Example Order of Performances

※Components not used in the example are not shown.

### In the example...

1. Player A, the player with the highest number, will Perform.
2. Next in order of highest number is players B and D. Player B is the closest in a clockwise direction from Player A (the PickUp player) and will perform first. Then, Player D will Perform.
3. Finally, Player C, the player with the lowest number, will Perform.
4. Player E will not perform due to a Stage Clash.
